HTML Challenge

Curriculum Vitae

Part One

1. Create a web page for an imaginary CV (if you need content you can google 'lipsum' and fill it in with fakelatin!). It must include sections for:

   - Contact Information

   - Personal Statement

   - Work Experience

   - Education

   - Skills

2. Include custom css. This can be in the , using in-line styling or in a .css file.

3. Upload your work to GitHub and send me the link.

Bonus:

If you have completed the challenge, refactor your website to use bootstrap!

Additional sections you might want to include:

- Professional certifications

- Hobbies and Interests

- Languages

- Volunteering

- Projects

- Publications

- Awards and Conferences
